Summary

Backend Engineer with 4+ years of experience developing SaaS platforms, ERP solutions and business applications using Laravel, Symfony, Yii2 and CodeIgniter. Skilled in database optimization, Redis caching, asynchronous processing and cloud-hosted systems. Experienced in delivering maintainable backend solutions, improving application performance and supporting scalable product development. Interested in AI-powered applications, Retrieval-Augmented Generation (RAG) and semantic search.

Technical Skills

Backend: PHP 8+, Laravel, Symfony, Yii2, CodeIgniter, REST APIs, JWT, RBAC, Redis, Queue Workers

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Cloud & Tools: AWS (EC2, S3, RDS), Docker, Git, Linux, Nginx

Additional: OpenAI APIs, RAG, PHPUnit, Vue.js

Experience

Houzeo May 2025 – Present
Software Developer (Laravel) Thane, Maharashtra

- Develop and maintain backend services powering a cloud-hosted real estate SaaS platform used by thousands of customers.
- Improved application responsiveness through Redis caching and database optimization techniques, reducing query execution times by over 25%.
- Designed integrations and backend features supporting internal operations and customer-facing functionalities.
- Worked with AWS services including EC2, S3 and RDS to support application hosting, storage and deployment activities.
- Collaborated with cross-functional teams to deliver enhancements, bug fixes and production improvements.
- Prototyped AI-powered search capabilities using OpenAI APIs, embeddings and Retrieval-Augmented Generation concepts.

Zyntrich Tech Feb 2024 – Apr 2025
Senior Software Developer Navi Mumbai, Maharashtra

- Led and mentored a team of four developers delivering enterprise-grade backend solutions.
- Designed modular services and reusable components improving maintainability and future scalability.
- Implemented asynchronous processing using queues and background jobs to improve reliability.
- Supported deployment activities leveraging Docker containers and AWS environments.
- Conducted code reviews and collaborated with stakeholders on technical planning and architecture discussions.
- Participated in requirement analysis, sprint planning and feature estimation activities.

Parasight Solutions Mar 2022 – Jan 2024
PHP Developer Kalyan, Maharashtra

- Developed ERP, School Management and business applications using Laravel, Symfony, Yii2 and CodeIgniter.
- Built backend services and integrations consumed by web and mobile applications.
- Integrated Razorpay and PayU payment gateways, improving payment completion rates by approximately 15%.
- Developed authentication, authorization and workflow automation modules enhancing operational efficiency.
- Collaborated with designers, QA engineers and clients to deliver business requirements.
- Managed multiple projects simultaneously while maintaining quality standards and delivery timelines.

Projects

Laravel RAG API
Laravel, OpenAI API – [GitHub](#)

- Built a Retrieval-Augmented Generation backend supporting document-based question answering using embeddings and semantic search.

ERP System
Laravel, Flutter, MySQL – [GitHub](#)

- Developed an ERP platform featuring JWT authentication, RBAC and modular business management capabilities.

Education

Mumbai University
Bachelor of Science in Information Technology (B.Sc IT) – CGPI: 8.87

2019 – 2022
Maharashtra, India
