Summary

Backend Developer with 4+ years of experience across product and service-based companies, designing and owning RESTful APIs and backend systems in PHP and Laravel. Proven track record of driving 25–40% improvements in throughput, query latency, and operational efficiency through caching, indexing, and architecture-level optimization. Experienced in mentoring developers, working with AWS-based deployments, and applying microservices and distributed systems concepts to backend design. Building applied AI capability through OpenAI/RAG-based semantic search integrations.

Technical Skills

Backend: PHP, Laravel, REST API Design, Backend Architecture, System Design Fundamentals, JWT Authentication, Redis, Queues, Caching

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Database & Schema Design

Frameworks: Laravel, CodeIgniter, Yii2, Symfony

Architecture: Scalable Backend Systems, Performance Optimization, Microservices Concepts, Distributed Systems Fundamentals

AI/LLM: OpenAI API, RAG, Embeddings, Semantic Search

Cloud/DevOps: AWS (EC2, S3, RDS), Docker, CI/CD, Git, Linux

Other: Payment Gateway Integration, RBAC, API Integration, SDLC

Frontend: JavaScript, Vue.js, HTML, CSS, Tailwind CSS, Bootstrap

Experience

Houzeo May 2025 – Present
Software Developer (Laravel) Thane, Maharashtra

- Own backend services and REST APIs for a high-traffic SaaS platform serving thousands of active users, making architecture and caching decisions to keep services reliable under load.
- Evaluated and implemented a revised Redis caching strategy after identifying throughput bottlenecks, improving system throughput by 30%+.
- Identified and resolved query performance issues through indexing strategy redesign and schema optimization, reducing database query latency by 25%+.
- Proposed and led a proof-of-concept integrating OpenAI APIs and RAG-based semantic search, presenting findings to product stakeholders to inform platform roadmap decisions.

Zyntrix Tech Feb 2024 – Apr 2025
Senior Software Developer Navi Mumbai, Maharashtra

- Led and mentored a team of 4+ developers, driving a 30% improvement in platform scalability and performance.
- Owned design and development of REST APIs and backend services supporting business-critical applications, structured around microservice-style modular boundaries for independent scaling.
- Architected backend integrations and asynchronous processing workflows to improve system reliability.
- Established CI/CD pipelines and containerized deployments with Docker, provisioning and managing AWS infrastructure (EC2, RDS) for staging and production environments.

Parasight Solutions Mar 2022 – Jan 2024
PHP Developer Kalyan, Maharashtra

- Built backend systems using Laravel and CodeIgniter, improving development efficiency by 25%.
- Integrated Razorpay and PayU payment gateways, improving payment success rates by 15%.
- Designed and delivered ERP and School Management Systems with RBAC and REST API integrations, improving operational efficiency by up to 40%.
- Collaborated with cross-functional teams to gather requirements and translate them into backend features, supporting multiple concurrent client projects.

Projects

Laravel RAG API

Laravel, OpenAI API, REST APIs – [GitHub](#)

- Designed and built a RAG backend using Laravel, OpenAI APIs, embeddings, and semantic search over REST APIs.

ERP System

Laravel, Flutter, MySQL – [GitHub](#)

- Architected and developed a full ERP platform using Laravel, Flutter, MySQL, JWT authentication, and RBAC.

Education

Mumbai University

Bachelor of Science in Information Technology (B.Sc IT) – CGPI: 8.87

2019 – 2022
Maharashtra, India
